

Employee Payroll Management System

2200032479

2200031742

2200030813

INTRODUCTION

The **Employee Payroll Management System** is a robust software application designed to streamline and automate payroll processes for organizations. Built using the .NET framework, this system ensures efficient management of employee records, salary calculations, and tax deductions while maintaining a high level of accuracy and security

MODULES

Authentication module

Employee Information Management

Attendance and Leave Management

Salary Calculation

Tax Deduction and Compliance

Payment Integration

Reports and Analytics

Role-Based Access Control

MODULES DESCRIPTION

1. Employee Information Management:

- ☐ Add, update, and delete employee records.
- ☐ Store job profiles, contact information, and bank account details.

2. Attendance and Leave Management:

- ☐ Integrate attendance records to compute salaries based on working hours or days.
- ☐ Process deductions for leaves exceeding allowed limits.

3. Salary Calculation:

- ☐ Automate gross and net salary calculations.
- ☐ Factor in allowances, bonuses, overtime, and deductions.

MODULES DESCRIPTION

4. Tax Deduction and Compliance:

- ☐ Compute income tax, provident fund, and other deductions.
- ☐ Generate tax reports and salary slips compliant with government norms.

5. Payment Integration:

- ☐ Connect with banking APIs to facilitate direct salary disbursement.

6. Reports and Analytics:

- ☐ Provide insights through graphical and tabular reports.
- ☐ Allow exporting reports in PDF, Excel, and CSV formats.

7. Role-Based Access Control:

- ☐ Differentiate access for HR, payroll managers, and employees.
- ☐ Enable employees to view their payroll details securely.
